

22nd 'Saalburg' Summer School

FOUNDATIONS AND NEW METHODS IN THEORETICAL PHYSICS

05 – 16 September, 2016
Wolfersdorf, Thüringen

This school gives up to 35 PhD students of theoretical physics the opportunity of becoming familiar with a selection of modern aspects and methods in theoretical and mathematical physics. Basic knowledge of quantum field theory, general relativity and group theory is assumed. Lectures and exercises will be conducted on:

Convergent and divergent series in physics	C. Bender	Washington University, St. Louis
BV quantization	G. Barnich	Université Libre de Bruxelles
Confinement, Yang-Mills, and super-Yang-Mills	E. Poppitz	University of Toronto
Scattering amplitudes	S. Weinzierl	Universität Mainz
Conformal bootstrap	A. Vichi	CERN Genève

For electronic application and further information please go to

<http://www.itp.uni-hannover.de/saalburg>

The deadline is 30 June, and further instructions (list of participants, suggested literature) will appear starting July. Participants cover their travel and a school fee of 150 Euro; lodging and food (without drinks) are provided by the school. In 2002, the school's location moved from Saalburg to the hotel *Am Kellerberg* in the village of *Trockenborn-Wolfersdorf*, about 20 km southeast of Jena in the foothills of the Thüringer Wald.
